EXPERIENCE

10/2017 ANCESTRY.NOM – A SOCIAL MEDIA SITE CENTERED AROUND FAMILIES AND FOOD

Full Stack Developer

- Ancestry.nom is a social media site that facilitates extended families sharing recipes.
- Responsible for design, framework, user authorization and database routing. This application makes use of Express, React, MongoDB and Passport.js
- ancestrydotnom.herokuapp.com

10/2017 FABULIST – A STORY-TELLING GAME

Full Stack Developer

- Fabulist is a collaborative story-telling game in the style of Exquisite Corpse.
- Responsible for the database components of this app. We used MySQL with Sequelize for an ORM. I utilized Express-fileupload to facilitate storage of drawing files on AWS S3.
- fabulist.herokuapp.com • travelbuddy-8ad21.firebaseio.com

10/2017 TRAVELBUDDY

Full Stack Developer

- An app that helps travelers plan trips to new destinations. A user can save lists of activities that can be referenced later when trying to decide where to eat, where to get a drink, what museums to visit...
- Responsible for the mapping functionality including the use of Google Maps JavaScript API, Google Maps Geocoding API and Google Places API Web Service
- github.com/ruffcorn33/TravelBuddy
- travelbuddy-8ad21.firebaseio.com

2008–2016 FINANCIALS AND SUPPLY CHAIN ANALYTICS

Senior Software Engineer

- Original member of a team that developed analytics applications to support and add value to ERP products.
- Developed the Inventory and Payables modules using a variety of technologies including SQL, SQL Server and OLAP.

1997–2008 PAYROLL CHECKS FILE PROJECT

Senior Software Engineer

- Designed and developed a new payroll file to solve a problem with a file that was bloated and difficult to process. Devised a file structured like XML that processed 85% faster than the previous version.
- Developed and maintained programs for the calculation of overtime and submission of the ACH bank file as well as Canadian year end processing.

TECHNICAL SKILLS

JavaScript, jQuery, React, Node.js, HTML 5, CSS, AJAX, Bootstrap 4, Express, SQL, MS SQL Server, MySQL, Sequelize, MongoDB, Mongoose, OLAP, Firebase, Passport, Handlebars, Google Maps APIs, AWS S3, Visual Studio, VS Code, application documentation.
